

Kubernetes API primitive, also known as Kubernetes objects, are the basic building blocks of any application running in Kubernetes. Building and managing Kubernetes applications means working with objects. It is essential to be familiar with Kubernetes objects in order to develop applications for Kubernetes. In this lesson, we will discuss what Kubernetes objects are, and how to find information about objects in a cluster.

## Relevant Documentation

## Lesson Reference

```
kubectl api-resources -o name  
  
kubectl get pods -n kube-system  
  
kubectl get nodes  
  
kubectl get nodes $node_name  
  
kubectl get nodes $node_name -o yaml  
  
kubectl describe node $node_name
```
